

ISCRAES 2020

INTERNATIONAL SYMPOSIUM ON CLIMATE-RESILIENT AGRI-ENVIRONMENTAL SYSTEMS

19-22 May 2020; Talbot Hotel, Stillorgan, Dublin, Ireland

WWW.ISCRAES2020.ORG

Contributing to the United Nations Sustainable Development Goals

About

Agricultural systems are large contributors to global greenhouse gas emissions and environmental pollution. An integrated approach is required for their mitigation and the creation of climate-smart, sustainable production systems.

The Climate-Resilient Agri-Environmental Systems (CRAES) group was formed to address this challenge by harnessing multi-disciplinary expertise and engaging with policy makers and the stakeholders.

The ISCRAES meeting is an initiative of the group and will bring together international experts working on carbon-neutral agricultural systems and UN SDGs.

Abstract submission

The meeting will cover climate change impacts, environmental degradation, GHG mitigation and sustainability issues under five main themes:

1. Arable cropping systems
2. Grassland systems
3. Agro-Silvo-Pastoral systems
4. Decision support tools
5. Socio-economic costing

Types: (i) Oral, (ii) Flash Talks & (iii) Posters.

Deadline: 30/11/ 2019

Acceptance notification: 16/12/2019

Registration

Please register and pay at:
